

計算練習Ⅰ 分数×整数・分数÷整数

基礎⑥

Ⅰ 計算をしましょう。

(1) $\frac{9}{5} \times 8 = \square \frac{\square}{\square}$

(2) $\frac{3}{2} \times 7 = \square \frac{\square}{\square}$

(3) $\frac{7}{8} \times 5 = \square \frac{\square}{\square}$

(4) $\frac{5}{8} \times 5 = \square \frac{\square}{\square}$

(5) $\frac{1}{3} \times 8 = \square \frac{\square}{\square}$

(6) $\frac{2}{9} \times 8 = \square \frac{\square}{\square}$

(7) $\frac{4}{3} \times 8 = \square \frac{\square}{\square}$

(8) $\frac{3}{2} \times 9 = \square \frac{\square}{\square}$

(9) $\frac{3}{5} \times 3 = \square \frac{\square}{\square}$

(10) $\frac{6}{7} \times 9 = \square \frac{\square}{\square}$

(11) $\frac{13}{7} \div 4 = \frac{\square}{\square}$

(12) $\frac{8}{9} \div 3 = \frac{\square}{\square}$

(13) $\frac{8}{5} \div 7 = \frac{\square}{\square}$

(14) $\frac{3}{7} \div 2 = \frac{\square}{\square}$

(15) $\frac{1}{3} \div 8 = \frac{\square}{\square}$

(16) $\frac{2}{5} \div 9 = \frac{\square}{\square}$

(17) $\frac{1}{2} \div 5 = \frac{\square}{\square}$

(18) $\frac{4}{5} \div 6 = \frac{\square}{\square}$
